
Conservation Science and Leadership Course

Pacific Biodiversity Institute is offering a 4-week Conservation Science and Leadership Course May-June 2016. The course will be held in the spectacular North Cascade Mountains and students will gain a diverse and holistic view of ongoing conservation and management issues prevalent throughout the Pacific Northwest.

Applications will be available starting in early January 2016. If interested, please email: education@pacificbio.org

Who: Upper-level undergraduate students and recent graduates who are preparing to be conservation leaders and professionals

What: Participate in an intensive 4-week field ecology and leadership course learning about relevant conservation biology topics, state-of-the-art field ecology techniques, and delving into research protocols

Where: Methow Valley, Washington

When: May 23rd 2016 - June 19th 2016

Cost: $1,250 to cover lodging and food at North Cascades Basecamp for four weeks.

Course content includes:

- Leadership and team development
- Presentations, field trips, and hands-on experience with conservation and wildlife biology, restoration, forest and fire ecology
- Conducting field surveys and sampling methods
- Learning about wildlands and their role in maintaining biodiversity
- Discussing philosophical dimensions of human-nature relationships
- Networking opportunities with scientists, agencies and organizations
- Skills to conduct team research projects
- Hiking, swimming, bird watching, and other recreational opportunities

This course was made possible with generous support from the Mountaineers Foundation, Paul Wiseman Environmental Education Grant.
